A Building Brimful of Toys.

Not a side or a department or a floor-but AN ENTIRE STRUCTURE FILLED TO ITS FULLEST. Jammed and packed and crowded with the jolliest and brightest and cleverest playthings that we could find. We've made the Johnson & Luttrell building into a vast Christmas fair. The staid and sober old place is in its second childhood. And its gloom and quiet have given way to mirth and the excitement of Yuletide buying. We bought these toys while you were paying your ice bills. Bought as we've purchased for the past forty years.—from the toy factories of Nuremburg and Berlin and Vienna. It took us saying through the Black stock perfect. Mr. 8. Kann, the founder of this business, himself spent all of last spring and vienna, the pour rest has been keen to the past of the business. Forest and the Hartz Mountainsplacing his orders in a hundred bamlets. This stock until a few days ago has been kept in our vast Baltimore warerooms. Now we've transferred it in all its completeness to the Busy Corner. We're proud of our assemblage. Proud because we've been buying toys for forty years, and every year we've learned to buy better. We were importers when many a Wash ington concern was trembling in the uncertainty of establishment. And it's only natural that putting all our time and attention and brains and watchfulness to their selling that we-should consider curselves in a field where we can perceive no assemblage that we can recognize in the light of competition.

The Greatest Silk Firm in the World Dissolves Partnership and the Busy Corner Secures the Cream of its Stock.

Eisem in Bros., corner of Grand and Wooster Streets, New York, who for years have been the undisputed silk kings of the world, cast a thun lerbolt into the markets of America by announcing the dissolution of Partnership. We were in New York-in their ve.y establishment selecting holiday Silks while the members of the firm were in the private office signing the articles of dissolution. We, as the recognized silk house of the South, were invited to take first pick of their stock. No other Washington firm got an inch of the goods. Eiseman Bros. dealt with king-pins only. And in us they recognize the first of Washington retailers. It was the most wonder ul stroke of luck in our lucky career. We were actually the first choosers in the entire United States. Whoever else bought (and after us there were a hundred large establishments from all over the land who rushed to share the spoils) had to take what the Busy Corner was content to leave. We skimmed the cream of the stock. We took nothing but rare and demanded colors. We selected only exclusives, and picked the richest and rarest and most superb silks in their warerooms. It was a lifetime opportunity and one that could never occur again, and we rose to the heights of its importance. Tomorrow we'll give leaders that will make competition realize how futile and impossible it is to try and check the tide that flows to the Busy Corner. We'll name prices that never knew a like level. And we'll give silks as fine as any store in Washington ever felt justified in handling.
